How to Edit Other Pages Using Elementor

Elementor Editor · https://thewebops.com/ar/help-center/elementor-editor/how-to-edit-other-pages-using-elementor/

Why Use Elementor?

Elementor makes it easy to edit website pages using a visual, drag-and-drop editor. It's perfect for updating page content without technical knowledge and helps maintain consistent design across your site.

With Elementor, you can:

- Edit page content visually and instantly
- Duplicate sections to reuse layouts
- Add new sections and widgets as needed
- Preview changes before making them live

How to Access Other Pages in Elementor

1. Log in to your **WordPress Dashboard**
2. Go to **Pages**
3. Hover over the page you want to edit (for example: About, Contact, or Services)
4. Click **Edit with Elementor**

Elementor will open with a live preview of the selected page.

How to Change Text on a Page

1. Click on the text you want to update
2. Edit the content directly on the page
3. Use the sidebar to style the text (font, color, alignment)
4. Click **Update** to save changes

How to Change Images on a Page

1. Click on the image you want to change
2. In the sidebar, click **Choose Image**

3. Upload or select a new image from the Media Library
4. Click **Update**

How to Duplicate Sections on a Page

1. Hover over the section you want to duplicate
2. Right-click the section handle (six dots)
3. Click **Duplicate**
4. Modify the duplicated section
5. Click **Update** to save

How to Add a New Section to a Page

1. Click the **+** icon
2. Choose a section layout
3. Add widgets such as text, images, buttons, or videos
4. Adjust layout and styling in the sidebar
5. Click **Update**

Helpful Tips

- All pages use the same Elementor editing workflow
- Duplicated sections help maintain consistent layouts
- Changes are not visible until you click **Update**
