How to Change Your WordPress Password

WordPress Basics · https://thewebops.com/ar/help-center/wordpress-basics/how-to-change-your-wordpress-password/

Regularly updating your password helps keep your account protected and your website secure.

Steps to Change Your Password

1. Log in to your WordPress dashboard.
2. Go to **Users** from the left-hand menu.
3. Click **Edit** under your user account.
4. Scroll to **Account Management**.
5. Click **Set New Password**.
6. Use the suggested password or enter your own.
7. Click **Update Profile**.

Password Best Practices

- Use a mix of letters, numbers, and symbols.
- Avoid using personal information.
- Change your password every few months.
