How to Install Premium Templates for Free

The **Install Premium Templates for Free** option allows you to use a premium website template without installing it yourself. Our team will help you choose, install, and configure the template during a setup session.

This option is ideal if you want a professionally designed website but prefer guided assistance during the setup process.

Before starting this process, make sure you have completed the initial builder setup described in:
How to Build a Website with WebOps Builder

Step 1: Open the Manual Building Options

After completing onboarding, choosing **Build it Yourself**, and clicking **Start Building**, you will see different website building options.

Step 2: Select Install Premium Templates for Free

From the available options, choose **Install Premium Templates for Free**.

This option connects you with the WebOps team for assisted setup.

Step 3: Choose a Template

Before the setup session, you can browse premium templates from marketplaces such as:

- **ThemeForest**
- **Envato**

Choose a template that matches the style and features you want for your website.
During the setup session, our team will help you install the selected template.

Step 4: Schedule Your Setup Session

After selecting this option, you will be invited to schedule a setup meeting with our team.
During this session we will:

- review the template you selected
- install the template on your website
- configure the required plugins
- import the template demo content
- prepare your website for customization

This ensures your website is properly installed and ready to use.

Step 5: Customize Your Website

After the template is installed, you will have full access to your **WordPress Dashboard**.

From there you can:

- edit pages
- replace images and text
- customize colors and fonts
- add new pages
- manage menus
- install plugins

Most templates can be edited using **Elementor**, allowing you to customize your website visually.

What Happens Next?

Once the template is installed, your website will be ready for customization and publishing.
You will be able to manage your website through your **WordPress Dashboard**, including:

- Pages
- Posts
- Media

- Menus
- Theme settings

Helpful Tip

Before your setup session, try to choose a template that closely matches the website you want to build. This helps speed up the installation and customization process.
